kenguru pro

Since 2011, Kenguru Pro has been manufacturing and installing modern street sports equipment.

info@kengurupro.eu | 2020

kengurupro.eu

Kenguru Pro

It all started with the production of calisthenics—street workout—equipment. Already back then, we placed emphasis on quality, safety, functionality and design. Customers appreciated our approach to work, saw the attention that went into it and started giving us feedback. They shared with us what they wanted to see in our product range, and we started producing new lines of sports equipment.

- That's how these came to be:
- Fenced panna football areas
 - Kids' calisthenics equipment
 - Basketball units
 - Tables for table tennis
 - Equipment for people with disabilities (para-workout)
 - Boxing racks
 - Indoor calisthenics equipment

→ Parkour equipment.

8

All of our sports equipment has been TÜV certified and it is recommended by the World Street Workout and Calisthenics Federation.

↑
Street workout equipment
Horizontal bars, parallel bars, monkey bars, Swedish walls—equipment for outdoor body-weight training.

↑
Para-workout
Calisthenics equipment adapted for persons with disabilities (wheelchair users)

↑
Boxing racks
Outdoor, vandal-proof racks for putting up one or two boxing bags

↑
Indoor calisthenics equipment
Calisthenics equipment set up indoors (in gyms or health and fitness centers) or in places where putting up concrete is prohibited

↑
Basketball units
Vandal-proof units with an adjustable shield and hoop that can be set up on pickup or street basketball courts

↑
Parkour equipment
A special line of equipment for performing parkour

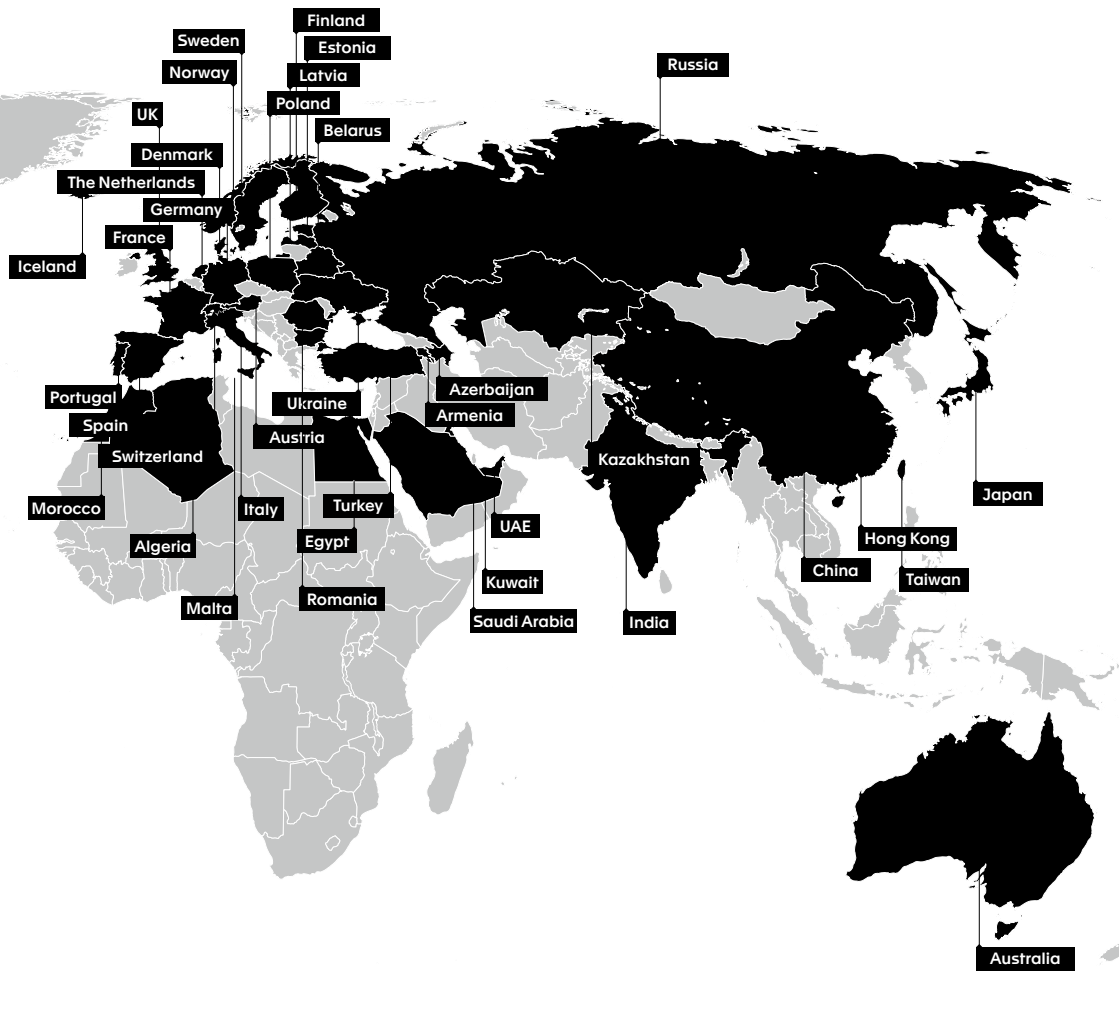

↑
Panna football
Special fenced football areas (or cages) for playing panna football. It is a type of street football requiring excellent groundwork, and ability to perform football tricks

47 countries

During the last 8 years, we have built sites in more than 50 countries and different climate zones. Our official representatives are working in 26 countries across the globe. Our equipment has been tested beyond the Arctic Circle, high up in the mountains, in Siberia and the Far East, as well as on the hot seacoasts in France, Spain and Australia.

Kenguru Pro

The vertical columns are made of tubes 108 mm in diameter, which makes the complex safe and durable.

The horizontal bars and Swedish wall are made of tubes 34 mm in diameter, allowing for a comfortable and secure grip.

The sleek cast clamps are manufactured according to our patented technology. They help to secure the crossbars to the columns. Customers can adjust the height of the equipment pieces as they wish.

ABS plastic column covers are safer than their metal counterparts. They are designed and manufactured under the control of Kenguru Pro and using its unique technology.

The bench is made of wood polymer composite. It is a strong and durable material, resistant to rain and Sun. It does not rot or burn like regular wood.

All of our sports equipment has been TÜV-certified and it is recommended by the World Street Workout and Calisthenics Federation.

Kenguru Pro

Our factory is located in Riga, Latvia. In-house production and warehousing allow us to have a stock of standard equipment in the stock—deliveries take 1-2 working days from the moment of payment.

In 2018, we revamped our production base with completely new and cutting-edge machines and painting and shot blasting chambers. The specialists working in them improve their professional skills at workshops held by relevant manufacturers every year. In addition, they undergo internal training and pass quarterly tests to maintain their qualification.

In production, we use modern metal processing technologies—shot blasting, application of zinc-rich paint, powder painting—and modern materials: HPL plastic, wood-polymer

composites, and ABS plastic.

In 2019, we started using hot-dip galvanizing equipment to immerse shot blasted metal products into a molten zinc bath.

Advantages of the hot-dip galvanizing method:

- Vandal-proof. In case of local damage, the corrosion does not spread to adjacent areas
- Environmental resistance, i.e. rain, Sun, fog, temperature variations, or sea mists.
- 25-year warranty

workout

Outdoor equipment includes horizontal bars, parallel bars, monkey bars, Swedish walls and other equipment where to practise calisthenics / street workout. It, thanks to the inherent simplicity and efficiency, is becoming a Sport for All.

Calisthenics / street workout parks give everyone the opportunity to keep themselves in excellent physical shape. All you need is the desire to train. In calisthenics, you use your own body-weight, which makes the risk of injury minimal. Training on horizontal and parallel bars is suitable for both men and women, the elderly and children. As these parks have become a place for joint training, not only amateurs, but also professional athletes—boxers, swimmers, footballers, runners—come together in this one place. Here they can improve their general physical condition, which is necessary in any type of sport.

zinc

In 2019, we started producing a line of hot-dip galvanized equipment. The equipment produced with this method can be installed in places with an aggressive environment, for example, sea coasts and other areas with high humidity and frequent temperature fluctuations. In this product line, hot-dip galvanized columns are combined with black moire-painted crossbars, giving them a stylish look. Comes with a 25-year warranty.

Beginner circuit
training example

panna

Panna football is a type of street football, where the game takes place in a special fenced football area (or cage). The winner is the one who is better at controlling the ball, and who knows how to make masterful feints and effective groundwork. There are no strict rules—players invent them on the go. Panna football is rapidly gaining popularity in Europe.

FF-06

FF-06/1

kids

Equipment line adapted for children of preschool and primary school age. Components are mounted lower than in the standard line and are smaller in size. Types of equipment are chosen taking into account the interests of children from 3 to 8 years of age. That's why there are a lot of monkey bars, Swedish walls, rockclimbing walls, ropes and rings.

basketball

In Europe, interest in basketball is growing rapidly, and it's already among the top five most popular sports. To ensure widespread availability, it is necessary to build outdoor courts. Kenguru Pro basketball units meet all the requirements of such facilities, being vandal-proof, safe and durable.

Basketball units

49

S-006

ping pong

Table
tennis

51

Outdoor tables for table tennis must be vandal-proof. Normally, they're very bulky and heavy. Kenguru Pro tables for table tennis combine vandal-proof structure with a sophisticated, lightweight design.

TS-001

para

The workout equipment for people with disabilities has additional handrails for pull ups, lower horizontal and parallel bars. The parallel bars are specifically designed so that an athlete with a disability can easily reach them in a wheelchair.

P-018

Horizontal bars: 4 pcs.
 Swedish wall: 1 pc.
 Bench: 1 pc.
 Incline bench: 1 pc.
 Incline parallel bars: 1 pc.
 Vertical handrails: 1 pc.
 Dimensions: 4.7 x 3.94 m
 Height: 2.6 m

boxing

Combat sports are gaining popularity in Europe. But the outdoor training infrastructure for fighters is poorly developed. Kenguru Pro vandal-proof boxing racks have been developed specifically for public spaces. They also go together with calisthenics parks perfectly.

S-003

Dimensions: 1.4 x 0.45 m
Height: 3 m
Weight: 220 kg

indoor

Equipment for calisthenics/street workout, installed inside premises (gyms, health and fitness centers) or where laying concrete is prohibited. Ideal for holding indoor competitions, master classes, and public events—city festivals and other celebrations. This line of equipment is used by the World Street Workout and Calisthenics Federation in world championships and world cups.

parkour / chase tag

Parkour / Chase tag

69

Kenguru Pro parkour/chase tag equipment has been developed taking into account the opinion of leading practitioners (or tracers). This makes the performance of tricks more dynamic and efficient.

Nowadays parkour/chase tag is one of the popular directions

of physical culture and fitness. Enthusiasts are practicing on both the streets and construction sites of the urban areas and on specially equipped open-air grounds. It is very important that all elements of the training grounds meet high requirements of safety, durability and comfort.

clusters

These sports complexes with clusters of equipment gather in one place the fans of different street subcultures and sports:

- Calisthenics (street workout)
- Panna football
- Basketball/streetball
- Boxing
- Table tennis/ping-pong
- Volleyball
- Parkour

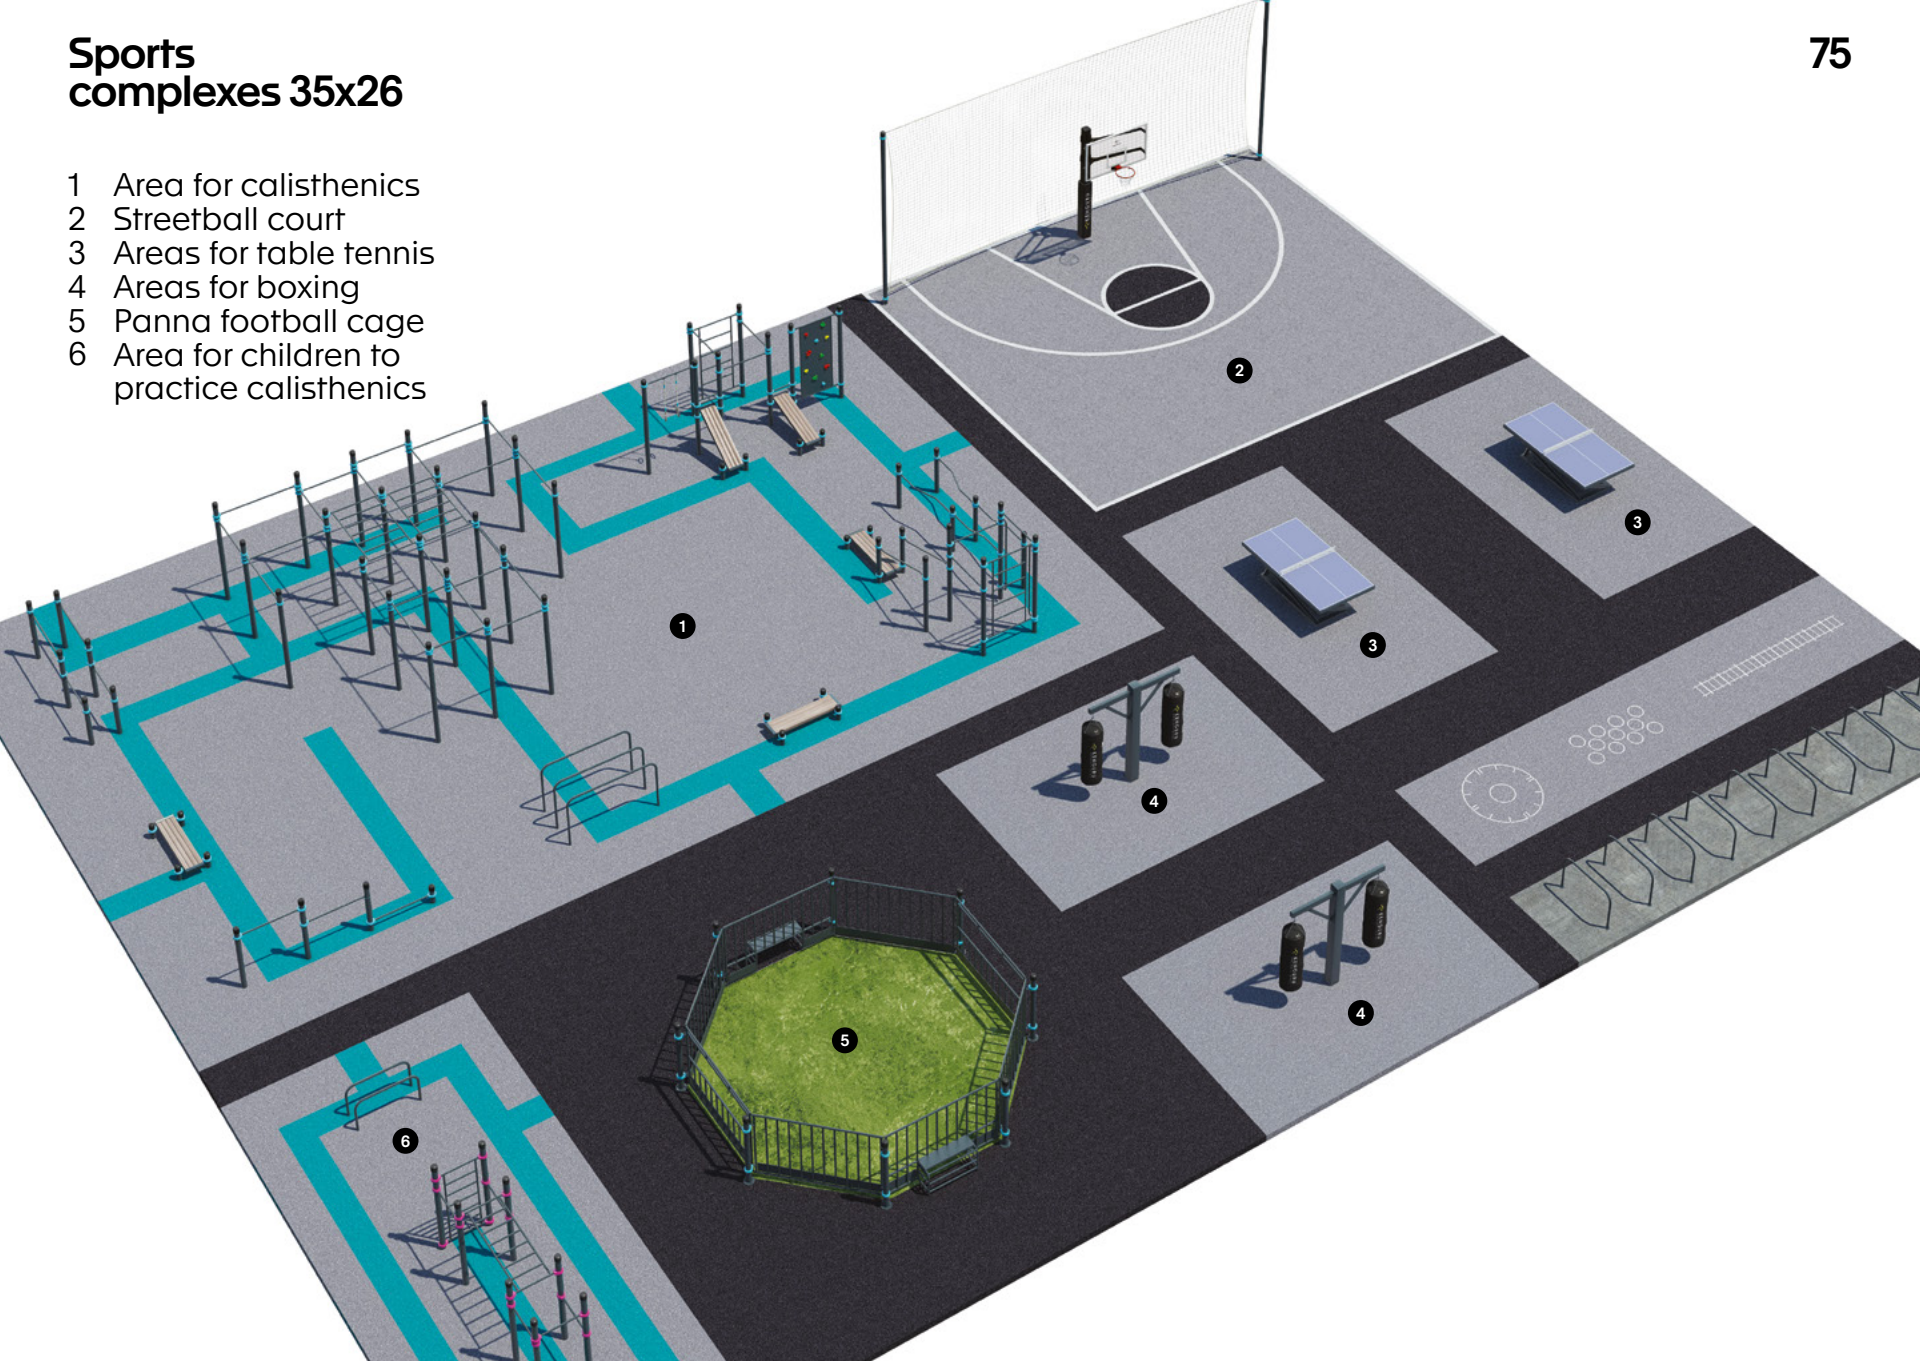

Such sites attract a lot of followers of a healthy lifestyle, which promotes an exchange of best practices. This then leads to an increase in the number of people involved in physical activities and sports.

Sports complexes 35x26

75

- 1 Area for calisthenics
